

Access to **flexible credit** for consumers and businesses is a key driver of economic growth and several options have recently been made available at D&S for partners in need of financing. This includes:

- Daylipa Haba: A save to purchase digital service.
- Daylipa Paygo: offer solar powered pumps and accessories on a pay-as-you-go basis.
- Asset Purchase Framework Agreement – A structured approach to acquire solar systems with predictable and manageable payments.
- Lease to Own – A hassle-free way to enjoy solar energy immediately while working towards full ownership.
- Power Purchase Agreement (PPA) – A model where you pay for the energy consumed while we handle the installation and maintenance of the system.

These financing models are available in both USD and RWF, tailored to suit your financial preferences and operational requirements.

D&S and Huawei partnership is expected to drive adoption of the technology across Rwanda. Key products include: -

Huawei Sun Series Smart String Grid Connect Inverters are of transformerless design for the management of hybrid solar powered PV/AC mains power supply installations. The inverters convert the PV generated DC power to either single or three phase AC depending on model, and feed to the applied load prioritizing the PV output, supplementing with AC mains power if there is insufficient PV generated output.

Huawei Power-M & S is an intelligent integrated power supply system with a back-up facility. It includes a power module with inverter and a high-capacity lithium-iron phosphate battery and is compatible with either or both off-grid PV Solar or on-grid mains power supply all fitted in a compact IP65 enclosure suitable for indoor or outdoor installations.
