

YERBIS SOLAR COOKING STOVES COMPANY

YERBIS Ltd is an innovative private company based in Rwanda, registered under company number 103062396. The company specializes in renewable energy solutions, with a particular focus on solar-powered cooking stoves that provide sustainable alternatives to traditional energy sources. These stoves address critical environmental, social, and economic challenges, contributing to climate change mitigation and public health improvement. The company is led by Mr. Ernest Yves RURANGIRWA, an accomplished economist with over 20 years of leadership experience in developing countries.

As a member of EPD Rwanda, YERBIS collaborates with prominent institutions such as Rwanda Polytechnic, Rwanda Engineering and Manufacturing Corporate (REMCO), EDCL-REG, and a team of engineers from Belgium. These partnerships enable YERBIS to advance its renewable energy projects and deliver impactful solutions.

The company's mission is to promote clean energy adoption, reduce reliance on biomass fuels, and foster sustainable development. By improving public health through reduced indoor air pollution, creating jobs, and providing technical training, YERBIS contributes to local economic growth and enhances community resilience. Committed to innovation and sustainability, YERBIS is at the forefront of Rwanda's renewable energy transition.
